

Farm Hand Filter

Aquapproach's Farm Hand Filters are field proven for large and small applications. A properly sized system is crucial when dealing with high flow rates, high daily volume, and high mineral content situations. Our filters offer true depth filtration which will extend your run times and flow rates while simultaneously reducing backwash water usage and system footprint. Call us today so we can help you get cleaner water!

BEFORE

AFTER

Features:

- Filters out small particles and turbidity
- Reduces staining caused by iron and manganese
- Automatic backwash
- Scalable and flexible for large and small applications

Model	Cu. Ft.	Backwash Rate @ 30 PSI	Service Flow Rate GPM		Overall Dimensions		Pipe Size
			Standard	Max	D	H	
FHF2.5	2.5	13	11	18	13"	62"	1"
FHF5	5	28	22	35	18"	75"	1.25"
