

## ➤ EPIC System Precision Injection Panel

### Features:

- Pump options: Stepper motor & solenoid
- Turn down 4800:1 (stepper), 30% - 100% (solenoid)
- Even injection for better mixing
- Modes: Constant, Constant with external input, ppm, %, Pause-Work, Weekly, mA, Pulse, Volt, External Batch and Manual Batch.
- Construction: All wet ends are PVDF
- Automatic venting head available
- Static mixer
- Ultrasonic water meter
- Calibration column

*The EPIC panel is designed for highly accurate and repeatable delivery of any liquid. Simply select the final ppm or % concentration you desire and the system will handle the rest. Outfit your EPIC system with the Prisma stepper motor pump for best results. The Prisma pump determines the injection rate of the fluid and adjusts the steps of the motor to deliver an even distribution of the fluid no matter how fast or slow the process flow is.*
