

## AQUAPPROACH VS pH Panel

The **VS pH Panel** is a plug and play pH control system loaded with features. The system comes pre-wired ready to plumb into your process. A flow switch is utilized to ensure dosing only happens when water is moving. The controller has a 4-20ma output and comes standard with a usb data logger. The pump is controlled by a dosing contact and works as an on/off control based on the pH and the pH set point.

- Industrial pH sensor
- Controller with adjustable set point
- Local alarm
- Flow switch to disable no flow situations
- Works with any pump
- Plug and play design
- 4-20ma data logger
- Increase or decrease pH control
- Multi-functional solenoid pump
- PVDF & PTFE pump construction
- PVDF injection valve
